

## CORE COMPETENCIES

Captiva Solutions, since 2010, has been on a mission to educate and empower future cyber warriors with real-life skills for next-generation security threats; arming them with the knowledge, solutions, and tactics to protect organizations. Our training courses are customized to fit the needs of our partners, students, and your workforce and incorporates similar elements as the National Cybersecurity Workforce Framework developed as part of NIST's National Initiative for Cybersecurity Education (NICE).

As a certified Woman-Owned Small Business, we are committed to excellence and creating innovative and adapted solutions for our clients. Our vision is to transform traditional IT and cyber security training and become your preferred training service provider.

### Training Methodology

We utilize a **Real-Skills-for-Real-Jobs™** training methodology that delivers real-world learning activities integrated with hands-on exercises to distill complex theoretical topics under expert guidance and supervision.

Our approach:

- Identifies skills required per typical technology role and designs training courses to match specific roles.
- Delivers insight required to pass certification exams and zero-day skills required on Day One!
- Offers courses bundled with powerful sought after skills needed to succeed in the real world.
- Helps enhance knowledge retention through technical knowledge, value-add skills, and post-class support.
- Contributes to career growth and increased value helping students successfully apply their newly gained skills.
- Aligned with DoD Directive 8570.1 requirements
